ADDITIONAL NOTES

Symbols and Conventions

The following symbols are used in the chart:

"R" for Required

"O" for Optional

"N/A" for not applicable

"TBD" for To Be Determined

Note 1. EPL-3FHUBEGSTA REQUIRES ADD. CHARGING CABLE TO ACTIVATE HDMI OUTPUT

Note 2. EIA2UHUNBE REQUIER ADD. CHARGING CABLE TO ACTIVATE HDMI OUTPUT

Note 3. MD826ZM/A, MD098ZM/A CHARGING CABLE OPTINAL

Note 4: The issue of No Audio Output while in HDMI mode is a global mobile phone interoperability issue. This condition will always occur if the Bluetooth audio stream (A2DP) is made active before the source is set to HDMI. The Bluetooth audio stream can become active by setting the source to BT Audio or BT Pandora. The recovery method requires disabling the BT Audio stream by either:

1. Disabling BT audio from the head unit.
2. Disabling BT audio from the mobile device.
3. Disabling BT completely from the head unit.
4. Disabling BT completely from the mobile phone.

Note 5: The following MHL Adapters will operate correctly while powered using the Head Units USB port or Charge Adapter:

- KCU-610MH MHL Adapter
- Samsung HDTV Smart Adapter (ET-H10FAUWESTA)
